Notes: 1) Please avoid using the relay in an environment containing organic silicon,otherwise the entry of organic silicon into the relay may acceleration contact failure.If there are harmful substances and elements such as water vapor,H_2S,SO_2,NO_2,Cl,P,etc.In the use of environmental gases,it may lead to increased contact resistance and poor contact during the use of relays.In the above situations,please control the materials or use plastic sealed type and arrange relevant tests to confirm..
2) When there is surge current in the load, it is recommended to use $AgSnO_2$ contact material and confirm it in actual use.
3)The customer special requirement express as special code after evaluating by Hongfa.(A21) indicates that the maximum current carrying capacity of the product is 60A,(335) stands for product in accordance to IEC 60335-1(GWT).
4) Water cleaning or surface process is not suggested after the flux-proofed relays are assembled on PCB.
