

HFV6

AUTOMOTIVE RELAY

Typical Applications

Lighting control, Headlight control, Electromagnet control
 Air-conditioning, Heaters (seat, front/rear windows),
 Fan motors control, Fuel pump control, Wiper motors control

Features

- 30A switching capability
- Ambient temp. range up to 125°C
- 1 Form A & 1 Form C contact arrangement
- Plastic sealed and dust protected types available
- RoHS & ELV compliant

CHARACTERISTICS

Contact arrangement	1A, 1C	Shock resistance ⁴⁾⁹⁾	196m/s ²
Voltage drop	NO:Typ.15mV,250mV max.(at 10A)	Flammability ⁵⁾	UL94-HB or better (meets FMVSS 302)
	NC:Typ.25mV,250mV max.(at 10A)	Termination	QC ⁶⁾
Max. continuous current ¹⁾⁹⁾	NO:30A(23°C),25A(85°C),13A(125°C)	Construction	Plastic sealed, Dust protected
	NC:20A(23°C),15A(85°C),10A(125°C)	Unit weight	Approx. 22g
Min. contact load	1A 12VDC	Mechanical data ⁷⁾	cover retention (pull & push): 200N min. terminal retention (pull & push): 100N min. terminal resistance to bending (front & side): 10N min. ⁸⁾
Electrical endurance	See "CONTACT DATA"		
Mechanical endurance	1 x 10 ⁷ OPS (300OPS/min)	1) For NO contacts, measured when applying 100% rated voltage on coil.	
Insulation resistance	20MΩ min. (at 500VDC)	2) 1min, leakage current less than 1mA.	
Withstand voltage ²⁾	500VAC	3) The value is measured when voltage drops suddenly from nominal voltage to 0 VDC and coil is not paralleled with suppression circuit.	
Operate time ⁹⁾	Typ.: 5ms (at nomi. vol.)	4) When energized, opening time of NO contacts shall not exceed 100μs, when non-energized, opening time of NC contacts shall not exceed 100μs, meantime, NO contacts shall not be closed.	
	Max.: 10ms (at nomi. vol.)	5) FMVSS: Federal Motor Vehicle Safety Standard.	
Release time ³⁾⁹⁾	Typ.: 2ms	6) Do NOT knock on relays with hard objects such as rubber rod and rubber hammer during mounting, which might lead to relay damage.	
	Max.: 10ms	7) Only valid for QC version.	
Ambient temperature	-40°C to 125°C	8) Test point is at 2mm away from terminal end, and after removing testing force, the terminal transfiguration shall not exceed 0.5mm.	
Vibration resistance ⁴⁾⁹⁾	10Hz to 60Hz 0.35mm DA	9) Only for the 12VDC coil voltage type.	
	60Hz to 500Hz 49m/s ²

HONGFA RELAY

ISO9001, IATF16949, ISO14001, ISO45001, IECQ QC 080000, ISO/IEC 27001 CERTIFIED

2026 Rev. 1.01

- Notes:** 1) Corresponds to the peak inrush current on initial actuation.
 2) Corresponds to the peak inrush current on initial actuation (cold filament).
 3) The load wiring diagrams are listed below:

- 4) The load in the table excludes flasher. When applied in flasher, please connect by the polarity request according diagram 3, a special silver alloy contact material should be used and the customer special code should be (170) as a suffix.
 5) Loads mentioned in this chart is for relays with no parallel diode or Zener Diode. For those with parallel diode, Zener Diode or other components, please contact Hongfa for more technical supports.
 Please also contact Hongfa if the actual application load is different from what mentioned above.
 6) The 24V motor control for wipers, windows and door locks is a special application with highly dynamic inductive loads. To ensure reliability, please confirm key details with our technical support before product selection.

COIL DATA at 23°C

	Nominal voltage VDC	Pick-up voltage VDC max.	Drop-out voltage VDC min.	Coil resistance $x(1\pm 10\%)\Omega$	Parallel resistance $x(1\pm 5\%)\Omega$	Equivalent resistance $x(1\pm 10\%)\Omega$	Power consumption W	Max. allowable overdrive voltage ¹⁾ VDC	
								at 23°C	at 85°C
Standard	12	7.2	1.2	90	—	—	1.6	20	15

	24	16	2.4	441	1800	354.2	1.6	33	25

Notes: 1) Max. allowable overdrive voltage is stated with no load applied and minimum coil resistance.

ORDERING INFORMATION

		HFV6 / 012 Z S L J K -T R (XXX)									
Type	HFV6: QC HFV6-K: Grip & QC										
Coil voltage	012: 12VDC 024: 24VDC										
Contact arrangement	H: 1 Form A Z: 1 Form C										
Construction ¹⁾	S: Plastic sealed Nil: Dust protected										
Coil power	L: Sensitive Nil: Standard										
Terminal	J: QC Terminal without hole Nil: QC Terminal with hole										
Terminal plating code	K: Load terminal hot-dip Tinning, coil terminal electro-tinning Nil: Electro-tinning										
Contact material	T: AgSnO ₂										
Parallel coil ²⁾ components	R: Parallel transient suppression resistors D: Parallel transient suppression diode, with anode connected to terminal#2 D1: Parallel transient suppression diode, with anode connected to terminal#1 Nil: Without parallel components										
Special code ³⁾	XXX: Customer special requirement Nil: Standard										

- Notes:** 1) In environments with high humidity, moisture, or even condensation, and dust, such as relays used in engineering, mining, agriculture and other fields, or relays with mounting brackets installed outside of electrical boxes, it is recommended to use plastic-encapsulated products; in environments containing phosphorus, H₂S, SO₂, NO₂ and other harmful gases, plastic-encapsulated types must be used and tested and confirmed in actual use; in environments containing organic silicon, please avoid using dust-proof covers.
 2) If parallel diode, Zener Diode or other components are required, please contact Hongfa for more technical supports.
 3) The performance parameters of products with characteristic numbers shall be subject to the specific specifications provided by Hongfa.

Remark: Terminal vertical deviation tolerance is 0.3mm.

CHARACTERISTIC CURVES

Ambient temperature curve of the electrical endurance test

- 1) The minimum temperature is -40°C .
- 2) The maximum temperature is 125°C .
- 3) The durability test of the product is carried out according to the contact parameter table. If any of the actual load voltage, current and action frequency are different from the contact parameter table, please carry out the confirmation test again.

Disclaimer

The specification is for reference only. See to "Terminology and Guidelines" for more information. Specifications subject to change without notice. In case there is specific criterion (such as mission profile, technical specification, PPAP etc.) checked and agreed by and between customer and Hongfa, this specific criterion should be taken as standard regarding any requirement on Hongfa product.

We could not evaluate all the performance and all the parameters for every possible application. Thus the user should be in a right position to choose the suitable product for their own application. If there is any query, please contact Hongfa for the technical service. However, it is the user's responsibility to determine which product should be used only.
