Auxiliary contact arrangement	A: 1 Form A (Only 764 type can selection) Nil: Standard type							
Construction	S: Plastic sealed Nil: Flux proofed							
Contact material	T: AgSnO ₂ Nil: AgNi							
Insulation standard	F: Class F							
Special code	XXX: Customer special requirement Nil: Standard type 764: Contact gap≥4mm 991: Auxiliary contacts are gold plated							

Notes: 1) When there is surge current in the load, it is recommended to use AgSnO₂ contact material and confirm it in actual use.

2) The customer special requirement express as special code after evaluating by Hongfa.

3) Water clearing or surface process is not suggested after the flux-proofed relays are assembled on PCB.

4) Please avoid using the relay in an environment containing organic silicon, otherwise the entry of organic silicon into the relay may acceleration contact failure. If there are harmful substances and elements such as water vapor, H₂S, SO₂, NO₂, Cl, P, etc. In the use of environmental gases, it may lead to increased contact resistance and poor contact during the use of relays. In the above situations, please control the materials or use plastic sealed type and arrange relevant tests to confirm.
