

HFE85P-150

DIRECT CURRENT RELAY

File No.:E133481
RoHS compliant

Features

- Ceramic brazing sealed technology guarantees no risk of arc leaking and ensures no fire or explosion.
- Filled with gas (mostly hydrogen) to effectively prevent the oxidation burnt; the contact resistance is low and stable, and contact part can meet IP67 protection level.
- Carrying current 150A continuously at 85°C.
- Insulation resistance is 1000MΩ(1000 VDC), and dielectric strength between the coil and contacts is 3.3kV, which meets the requirements of IEC 60664-1.

CHARACTERISTIC CURVES

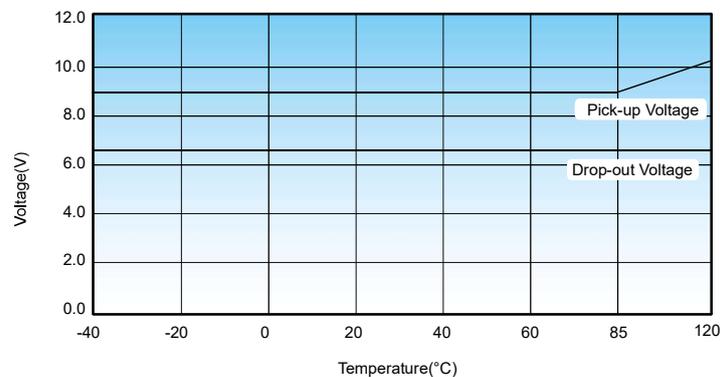

Endurance Capacity Curve

Notes:

1. The upper limit of safe operation temperature and functional temperature are set for 180°C and 130°C respectively.
2. To maintain the maximum long-term operating performance, absolute temperature should not exceed 130°C.
3. The data above is measured at the environment temperature 85°C with cross section area of wire $\geq 50\text{mm}^2$.
4. When the current is $\geq 2500\text{A}$, the relay is likely to be welded, but without any fire or explosion.

CAUTIONS

1. In case of loosening, please use washer when mount the relay with M5 screw, and the torque within 3N·m to 4N·m; The screw tightening torque at terminals shall be within 6N·m to 8N·m. The torque beyond the range may cause damage.

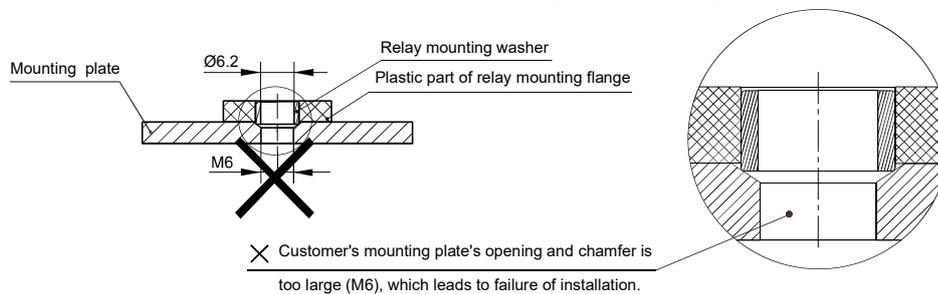

Mounting for load terminal				Mounting for relay body	
Mounting way	Torque requirement	Hole dia. of copper bus bar	Thickness of copper bus bar	Mounting way	Torque requirement
M6 Screw	6N·m~8N·m	Ø6.0mm~Ø6.5mm	2mm~3mm	M5 Screw	3N·m~4N·m

- Relay terminal lock vertically, please pre-lock first and then lock when installing, repeat locking is not recommended.
- When the customer uses special screws and nuts, such as nylok, need to communicate and confirm with Hongfa.
- When the customer has special installation requirement, such as upside down, multi busbar connection, need to communicate and confirm with Hongfa.
- Be careful that oils and foreign matter do not stick to the main terminal part and please use the wire with min. cross section area 50mm², otherwise the terminal parts may have abnormal heating.
- The recommended thickness of copper bus-bar is 3mm, otherwise it may cause screw loose or can not guarantee a tight mounting.
- Caution of mounting for relay body:

Unrecommended method

The hole of mounting plate at customer-side is too large.

Recommended method

The hole in mounting plate at customer-side is M5

Enlarged Schematic Diagram:

When use M5 screw, the thickness and strength of the washer needs to be guaranteed or it may deform and burst the cover.
